**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, 28-32, drawn to methods for identifying markers associated with pig growth.

Group II, claim(s) 18-21, 25-27, drawn to primers and kits.

Group III, claim(s) 22-24, drawn to markers.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups lack a special technical feature because the primer claims, in particular claim 26, lacks novelty over the prior art. The special technical feature must distinguish over the prior art, and since Urban et al teaches an oligonucleotide which terminates in TGGGCC, which perfectly matches a portion of SEQ ID NO: 1 and would function to amplify the Cyp11a1 gene (see page 25767, column 1), the claims lack a special technical feature.

3. A telephone call was made to Kathleen Rigaut on March 12, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
